

URGENT

message from the

Do you provide **WATER** for the public from your **OWN WATER SYSTEM?**

Notification from the Ohio EPA regarding newly passed Senate Bill 2 requiring ALL public water systems to develop and maintain an Asset Management program by October 1, 2018.

Senate Bill 2 requires a public water system to include the following in an Asset Management program:

- Inventory and evaluation of all public water system assets
- Operation and maintenance programs
- Emergency preparedness and contingency planning program
- Criteria and timelines for infrastructure rehabilitation and replacement
- Approved capacity projections and capital improvement planning
- Long-term funding strategy to support the implementation of the asset management program

The **Buckeye Golf Association** is helping you get a head-start on this new ruling by planning a statewide series of meetings to inform and help golf courses with their planning needs. Ohio EPA staff will be on site to explain the Asset Management program and to assist courses in completing the necessary paperwork required to be in compliance.

Please select your meeting site from the list below and complete the registration. There is no fee for attending, but we need your completed registration so we know how many are expected at each location. **Registration is at 9:00 a.m. and the program starts at 9:30.**

Thank you to our sponsors:
